COPPER MAGNET WIRE Product Data Sheet

CW 240 TP Class 240°C Copper

NEMA MW 64-C/65-C

DESCRIPTION

CW 240 TP magnet wire is a polyimide tape insulated system for continuous operation at 240°C or above.

This results in an insulation system that provides excellent dielectric properties and higher temperature capabilities for more severe applications.

APPLICATIONS

- AC Motors
- DC Motors
- Submersible Pumps
- Traction Motors
- Applications requiring a high temperature insulation

FEATURES & BENEFITS

- Excellent dielectric properties
- High temperature continuous operation
- Superb windability
- A wide range of types suitable for most any application

AVAILABILITY

CW 240 TP is available on copper conductors in various types and lappings.

Please consult the Craig Wire service team for more detailed information.
